- ICM paints have a matt surface after drying. To give a glossy or satin texture, an appropriate varnish must be used.
- For best results, the surface should be pre-coated with a primer, on which the paint is then applied.
- To facilitate the creation of various effects and color modulation, our primers are available in 6 di-terent colors, most commonly used in modeling.
- When using an airbrush, the paint should be thinned with ICM thinner 40-60%.
- The acrylic thinner is odorless and can be used to clean the airbrush.
